 LinkedIn: <https://linkedin.com/in/imam-hatris-ekaputra>
 Portfolio: https://imamh28.github.io/Portofolio_Imam

PROFESSIONAL SUMMARY

AI Engineer with experience in LLM development, RAG systems, NLP pipelines, and applied machine learning. Proficient in Python, PyTorch, TensorFlow, Scikit-learn, and deploying AI models into production with Streamlit, Flask, and REST APIs. Strong background in automation, data processing, and backend engineering. Seeking roles involving LLM application development, AI pipelines, and enterprise AI implementation.

EXPERIENCE

PT. Global Inovasi Cahaya (SMEC Group) — *Data Scientist*

Medan, Indonesia | Jan 2026 - Now

- Managed data for 30+ SMEC Group branches, data migration (BigQuery to ClickHouse), visualization, automation, and AI models for eye test receipt reading.

Futurescale Digital Technology — *AI Engineer*

Freelance | Des 2025 - Now

- Developed AI-driven business location recommendation systems using data analysis and machine learning to support strategic decision making.
- Built Computer Vision solutions for HR operations, including image/video-based analysis to improve internal process efficiency.
- Developed LLM-based chatbots and integrating models into production via Python and REST APIs.

PT. Mitra Integrasi Informatika (Metrodata Group) — *Full-Stack Developer*

Jakarta, Indonesia | Oct 2025 – Des 2025

- Contributed to enterprise software development using Java, focusing on performance, security, and deployment best practices.
- Collaborated with development teams to enhance backend reliability and software maintainability.

PT. Bahasa Kinerja Utama — *AI Engineer*

Jakarta, Indonesia | Nov 2024 – Feb 2025

- Developed a **RAG-powered Islamic LLM chatbot** using a 3B model and trusted knowledge sources (Tafsir Ibn Kathir).

- Built an **automated audio transcription pipeline** using Selenium, Speech-to-Text AI, and MongoDB, enabling fully automated meeting transcription.
- Integrated Python-based ML models into production using Streamlit and internal APIs.

Universitas Sumatera Utara Hospital — IT Support

Medan, Indonesia | Aug 2024 – Oct 2024

- Provided technical support for medical staff, managing software configurations and hardware troubleshooting to ensure uninterrupted healthcare services.
- Redesigned and optimized the hospital's queuing system architecture to improve patient flow efficiency and reduce waiting times across multiple departments.

IBM Skillsbuild for AI & Cybersecurity — Machine Learning & Cybersecurity Trainee

Indonesia | Feb 2024 – May 2024

- Built a recommendation system using Python and IBM NLU.
- Completed industry-focused ML, Python, and data science modules.

EDUCATION

Universitas Sumatera Utara

Bachelor of Information Technology (GPA 3.69/4.00)

Aug 2021 – Aug 2025

Achievements:

- Finalist LIDM National 2024
- First Winner Web Development Solution Challenge 2023
- Startup Digital Funding Recipient (Fasilkom-TI USU)
- Member of Google Developer Student Club

ORGANISATIONAL EXPERIENCE

MPMF USU — Deputy Secretary

Aug 2023 – Jul 2024

Developed Managed administration, documentation, and meeting coordination to ensure smooth operations of the assembly. Acted as a liaison between members and stakeholders, enhancing communication and work efficiency.

Robotik Sikonek USU — Leader of the Research and Development Division

Oct 2022 – Jun 2023

Led research initiatives, fostering innovation and development within the field. Coordinated team efforts in project planning and execution, driving advancements in robotics, control systems, and electronics.

TECHNICAL SKILLS

Programming: Python, Java, PHP, JavaScript

AI/ML: PyTorch, TensorFlow, Scikit-learn, LLMs, RAG, Vector DBs

Data & Tools: Pandas, NumPy, Matplotlib, MongoDB, MySQL

AI Application Development: LangChain, Streamlit, Flask, REST APIs

Automation: Selenium, Web Automation, Speech-to-Text Pipelines

Other: Git, Docker, Tailwind CSS, HTML/CSS/JS

PROJECTS

RAG-Based Islamic LLM Chatbot

- Developed a chatbot grounded in Tafsir Ibn Kathir using a 3B LLM + RAG.
- Implemented document retrieval, embedding pipelines, and query routing.
- Built the interactive UI in Streamlit.

Automated Audio Transcription Pipeline

- Automated meeting recording retrieval using Selenium.
- Processed audio with a Speech-to-Text model and stored transcripts in MongoDB.
- Deployed as an internal automation tool.

Medical Image Segmentation with Mask R-CNN

- Built a segmentation system achieving **IoU 0.8310** on 800 X-ray images.
- Deployed via Flask for clinical usability.

Gold Price Forecasting with LSTM

- Designed a stacked LSTM model achieving **96.8% accuracy** for time-series forecasting.

Book Recommendation Engine with IBM NLU

- Combined TF-IDF + Cosine Similarity with IBM NLU for sentiment-enhanced recommendations.

Customer Churn Prediction (Logistic Regression)

- Built a predictive analytics model achieving 80% accuracy.

Full-Stack Web Projects

- Laravel-based Project Management System
 - Native PHP Social Media Application (CRUD, auth, likes, comments)
-

SOFT SKILLS

Problem Solving · Critical Thinking · Collaboration · Adaptability

LANGUAGE

Indonesian (Native) · English (Intermediate, TOEFL 613)
